In our traditional way of teaching, the aim is to develop wisdom.
A person becomes wise when they can see what needs to be
done and do it successfully without being told what to do.

Johnny Morgan, Inuit Elder, Silatunirmut

WHY REGISTER?

We are facing enormous global challenges: climate change, resource depletion, population growth, cultural clashes, human rights abuses and more. Changing the path we're on requires:

- Understanding human progress, what it is and what it is not
- Understanding how our thinking, caring, priorities and behaviours are shaped
- Strengthening our collective capacity for wisdom

In this 49-hour weekend and evening program, we study patterns in human striving, failure and achievement throughout our species' development, so that we can build the capacities needed to reduce waste, suffering, ignorance and injustice for generations to come.
